Summary

Full Stack Software Engineer with hands-on experience developing scalable web applications, real-time systems, and backend automation solutions. Strong background in building responsive frontend interfaces, designing RESTful APIs, and working with database-driven architectures using modern JavaScript technologies. Proven ability to collaborate in team environments and contribute across the full development lifecycle.

Professional Experience

MERN Stack Developer, SILICONWHIZ 12/2025 – 04/2026

- Developed and maintained production-grade full-stack web applications across frontend and backend layers.
- Engineered backend automation workflows using webhooks and Supabase for event-driven data processing.
- Built Google Apps Script automation tools, leveraging AI APIs to automate repetitive business tasks.
- Integrated third-party services and AI-powered features for improved application functionality and usability.
- Contributed to client projects through testing, debugging, and feature enhancements to ensure code quality.

MERN Stack Developer Intern, ITBeam 08/2025 – 11/2025

- Contributed to e-commerce platform development across UI components and server-side logic using React and Node.js.
- Implemented role-based access control (RBAC) for 4 user roles, ensuring data integrity and secure authorization.
- Created 20+ responsive UI components with React and Tailwind CSS, achieving a 100% mobile-responsive interface.
- Optimized RESTful API consumption and database queries, improving overall system reliability and responsiveness.

Projects

Forless AI, AI-Powered Website Builder 🚀

- Delivered an AI-powered website builder enabling businesses to generate fully functional websites from prompts.
- Developed an end-to-end solution covering frontend, backend APIs, admin panel, and user dashboard.
- Integrated AI services and payment processing, delivering a production-ready deployment.

Chat App, Web-Based Chat Application 🚀

- Architected real-time one-to-one and group messaging with user authentication and scalable data modeling.
- Built backend logic for chat rooms and message history using Socket.IO, Prisma ORM, and MongoDB.
- Crafted an intuitive chat UI with real-time updates, typing indicators, and cross-device compatibility.

AJ Electronics, E-commerce Website 🚀

- Launched a MERN e-commerce platform with JWT authentication, email verification, and password reset.
- Integrated cart, checkout, order tracking, Stripe payments, and an admin dashboard with revenue analytics.
- Optimized responsive React and Tailwind CSS UI using state management and RESTful APIs.

Skills

Languages: JavaScript, TypeScript

Frontend: React, Next.js, Tailwind CSS

Backend: Node.js, Express, Socket.IO, Prisma ORM

Databases: MongoDB, MySQL, PostgreSQL, Supabase

Tools: Git, GitHub, Stripe, Google Apps Script, Postman

Education

Govt. College University, Lahore — BS Computer Science

09/2021 – 10/2025

Govt. Degree College Township, Lahore — FSc Pre-Engineering

05/2019 – 03/2021
