## SUMMARY

Full Stack Software Engineer with hands-on experience developing scalable web applications, real-time systems, and backend automation solutions. Strong background in building responsive front-end interfaces, designing RESTful APIs, and working with database-driven architectures using modern JavaScript technologies. Proven ability to collaborate in team environments and contribute across the full development lifecycle.

## PROFESSIONAL EXPERIENCE

**MERN Stack Developer, SILICONWHIZ (onsite)** 12/2025 – 04/2026

- Developed a real-time chat application supporting one-to-one and group messaging using Socket.IO, with scalable data modeling and efficient data management using Prisma ORM and MongoDB.
- Engineered backend automation workflows using webhooks, including payload normalization, Supabase database sync operations, and event-driven processing.
- Built automation tools using Google Apps Script, integrating AI APIs for data processing tasks.
- Contributed to client projects through testing, debugging, and feature enhancements across multiple applications.

**MERN Stack Developer Intern, ITBeam (onsite)** 08/2025 – 11/2025

- Engineered a full-stack e-commerce platform using MongoDB, Express, React, and Node.js (MERN) with Stripe payment integration, enabling secure checkout and reducing payment failures by 30%.
- Implemented role-based access control (RBAC) for Super Admin, Admin, Manager, and Employee roles, ensuring data integrity and secure authorization.
- Created over 20 responsive UI components with React and Tailwind CSS, achieving a 100% mobile-responsive interface and cross-browser compatibility.
- Integrated RESTful APIs and optimized database queries, improving response times by 25% and overall app performance.

## PROJECTS

**Chat App**, Web-based chat application 📄

- Designed real-time messaging, user authentication, and scalable data modeling for multiple simultaneous users.
- Built backend logic for chat rooms and message history, and shipped responsive React UI components with under-1-second message render latency across devices.
- Crafted an intuitive chat UI with real-time message updates, typing indicators, and a clean user experience across all screen sizes.

**AJ Electronics**, E-commerce Website 📄

- Launched a full-stack MERN e-commerce platform with homepage, shop, category, and product pages, implementing JWT authentication, email verification, and password reset for secure user management.
- Integrated cart, checkout, and order tracking with Stripe payments, and built an admin dashboard for product, customer, and order management with 6-month revenue analytics, improving operational efficiency by 50%.
- Optimized responsive React and Tailwind CSS UI for cross-device performance using REST APIs, state management, and authentication, reducing page load time by 25%.

## SKILLS

**Languages:** JavaScript, TypeScript.

**Frontend:** React, Next.js, Tailwind CSS.

**Backend:** Node.js, Express, Socket.IO, Prisma ORM, REST APIs.

**Databases:** MongoDB, MySQL, PostgreSQL, Supabase.

**Tools:** Git, GitHub, Stripe, Google Apps Script.

## EDUCATION

**BS Computer Science**, Govt. College University, Lahore 09/2021 – 10/2025

**Intermediate**, Govt. Degree College Township, Lahore 05/2019 – 03/2021
